

FOR PREPAREDNESS PLANNING

Many organizations have been looking for ways to strengthen their continuity of operations and disaster preparedness plans. Adding the ability to quickly deploy shelters in the field can be a powerful tool in case of emergency.

Life Cube, Inc. provides advanced shelter technology for disasters, emergencies, and crisis situations. Based on a rugged design for shelters supplied to the military, the Life Cube LC-8 Transformer Tent is a portable, inflatable shelter that can be used on the ground, on the bed of a pickup truck, and even floats on water. It comes in 2 hand-carried bags and sets up in only 15 minutes without tools.

Life Cube shelters provide low-cost, rapid deployment interim housing for disaster relief as well homelessness.

For more information on the Life Cube LC-8, click [here](#).

Contact us now for a free shelter/ housing needs assessment.

Sincerely,

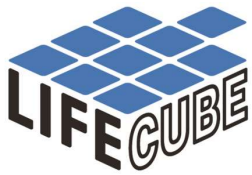

Constantine Davlantes
