

YURTi Stargazer

Personal Viewing Station

The world's first insulated, weatherproof, and durable, astronomy viewing shelter and camping tent

The **YURTi Stargazer**, intended for an observatory Star Party or off-grid exploring, is a revolutionary, ultra-portable shelter designed for dedicated astronomers and comfort-conscious campers. Combining advanced material technology with an intuitive, rapid-setup frame, the Stargazer provides a protected, climate-controlled environment for personal observation and comfortable overnight stays. It eliminates the limitations of traditional tents, packing down into a convenient rolling carry bag and setting up in minutes.

Enjoy comfortable space (even for users well over 6 feet tall!), and utilize the integrated roof port for clear, protected views. It's your ultra-portable, all-weather sanctuary for serious stargazing and comfortable camping.

YURTi Stargazer

Applications

- **Personal Astronomy:** A dedicated, comfortable space for viewing, astrophotography, and equipment protection.
- **Cold-Weather Camping:** Insulated design provides superior warmth compared to standard tents.
- **Remote Field Operations:** Ideal for temporary, rapid-response shelter in various environments.
- **Disaster Relief:** Durable, quick-setup design provides immediate, secure housing.

Market Positioning

- **Target Audience:**
 - Campers/outdoor enthusiasts
 - Astronomy hobbyists
 - School clubs and educational projects

Holds air for months. No fan needed. Resistant to Heat, Ozone, Oil, Chemicals, Solvents. Sustainable because it is recyclable, requires less energy to produce than some alternatives, and is a durable material that reduces the need for frequent replacement.
